

INTRODUCTION

The SMV Series, designed for surface mount applications, are small varistors manufactured in a leadless monoblock form. The SMV Series varistors have significantly lower profiles than our radial-leaded devices, thus reducing PC board design requirements. They are available with maximum continuous operating voltages (MCOV) ranging from 10VAC to 300VAC.

SMV Series are typically packaged in Tape and Reel packaging. To order in an alternate packaging scheme, please see the order code below or contact us.

STYLE DESIGNATION

The Maida Style Number is the typical means to identify our components when ordered. The style number identifies several parameters that are important for the characteristics of the device. An alternative ordering method, if known, is by our Item Number.

The following example is the standard part numbering system when ordering our SMT Series components by the Maida Style Number:

- | | | | | | | |
|--------------------------------------------------------------------------------|----------|----------|-----------|-----------|------------|-----------|
| | 8 | S | 17 | SM | 131 | T6 |
| 1. Package Description | ↑ | ↑ | ↑ | ↑ | ↑ | ↑ |
| 8 – Rectangular Block | | | | | | |
| 2. Size Designation | | ↑ | ↑ | ↑ | ↑ | ↑ |
| S – 0.320" x 0.200" (3220) | | | | | | |
| 4. Configuration | | | ↑ | ↑ | ↑ | ↑ |
| 17 – No leads | | | | | | |
| 5. Part Identifier | | | | ↑ | ↑ | ↑ |
| SM – Surface Mount | | | | | | |
| 6. AC Voltage Rating | | | | | ↑ | ↑ |
| Two significant figures plus number of zeroes that follow, i.e. 131 is 130 VAC | | | | | | |
| 7. Packaging Code | | | | | | ↑ |
| T6 – Tape and Reel
B – Bulk | | | | | | |

STANDARD MARKING

The SMV Series currently do not have markings. Special marking may be available upon request.

Recommended Land Pad Layout

Maida Style Number	Recognitions To Safety Agency Standards						Nominal Size (mm)	Minimum Marking	Maximum Ratings						Electrical Characteristics
